Linking DTD and XML Docs

- Internal DTD:

```
<?xml version="1.0"?>
<!DOCTYPE article [
   <!ELEMENT article (title,author+,text)>
   ...
   <!ELEMENT index (#PCDATA)>
]>
<article>
...
</article>
```

- Both ways can be mixed, internal DTD overwrites external entity information:

```
<!DOCTYPE article SYSTEM „article.dtd" [
   <!ENTITY % pub_content (title+,author*,text)
]>
```
