# More Examples of Web Services

**Prof. Ass. Dr. Isak Shabani**

- Geographical Information Systems are perfect candidates for WS
  - The Open Geospatial Consortium defines several relevant standards
    - Geographic Markup Language (GML) exchanges info.
    - Web Feature Service works with abstract GML feature data.
    - Web Map Service creates maps (images)
    - Lots more at http://www.opengeospatial.org/specs/?page=specs
- XMethods
  - Lots and lots of contributed examples, live demos
  - Try them
    - http://www.xmethods.com/
- Lots more for bioinformatics.
  - Easiest way to find is to download Taverna from SourceForge.
  - Then check out http://communitygrids.blogspot.com for guidelines.
- CICC is building many new one for chemical informatics.
